

- Lubricates
- Penetrates
- Electronics safe
- Prevents

Yours' Maintenance Solution

Sedo-X was developed for industry to prevent corrosion. Its stick to metal, almost like a magnet. It stop rust and prevent rust or corrosion, does not attract dust and lubricates. It also a penetrates and loosens frozen parts faster.

Available packing:

Sedo-X 15oz / Btl
Sedo-X 1 Gal / Pail

Benefit & Features:

- Sedo-X is unlike the ordinary lubricant it can stay the polar bonded and wear surfaces are separated by a thin film coating to reduce friction.
- Sedo-X displaces moisture, corrosion which causing by electrolytes and existing rust with clean metal.
- Sedo-X penetrates faster and often frees hopelessly seized parts because its attraction between metal.
- Sedo-X is non-conductive with a dielectric strength.
- It displaces rust and moisture and often restoring environment damaged electronics, cleaning contact points and improving connections.

Typical Application:

- Use in automotive plant as restore and protect unpainted metal parts, frame and body restroofing, frees rusted lugs, nuts and bolts, prevents battery terminal corrosion.
- Use in construction plant as stop or prevents corrosion on heavy equipment, lubricate and protect air and other tools.
- Use in industrial to lubricate locks, hinges, bearings, sliding door and window tracks, loading dock door, onboard electronics, air tools, power tools, rolling stock, roller, conveyors, stuck valves and etc.
- Use in marine plant to lubricate hatches and deck hardware, fishing reel and downriggers, throttle cables and steering mechanisms, seat swivels, pulleys, bearings, furling systems, winches and windlasses.
- Use in electrical plant for ignition system, switches, breakers and fuse holder, data and electrical connections, often restores electronic motors, radios, radar and computers and GPS.
